About the authors
Arne-Kristian Groven is a Senior Research Scientist at Norsk Regnesentral (NR). One of his areas of research is the area of semantic structures.

Norsk Regnesentral
Norsk Regnesentral (Norwegian Computing Center, NR) is a private, independent, non-profit foundation established in 1952. NR carries out contract research and development projects in the areas of information and communication technology and applied statistical modelling. The clients are a broad range of industrial, commercial and public service organizations in the national as well as the international market. Our scientific and technical capabilities are further developed in co-operation with The Research Council of Norway and key customers. The results of our projects may take the form of reports, software, prototypes, and short courses. A proof of the confidence and appreciation our clients have for us is given by the fact that most of our new contracts are signed with previous customers.

1 Introduction

This document describes the differences between Byggsøk XML, version 1.0, and the currently running version, Byggsøk XML, version 1.2.

Byggsøk version 1.0 was documented by Per Thomas Jahr in a document having the publication date: 28.th February 2003. It is written in Norwegian and the title is “Dokumentasjon av XML strukturer for Byggsøk”.

The current document aims at giving a full coverage of the differences between the two versions.

One general difference between the versions is that everything is made optional in version 1.2.

The structure of the documentation of Byggsøk XML, version 1.0, is kept.
2 Byggesak

Figure 1 The byggsak XML structure in version 1.2
The difference between the two versions is as follows:

- The element “be: dispensasjon” is included in version 1.2.

3 Byggesaksprosess

No changes.

4 Tiltaketsart

The difference between the two versions is as follows:

- The element “be: erestetikkrelevant” is included.
- New value options have been introduced: 204, 404-409, 950, 990-993
5 Part

Figure 2 The part XML structure in version 1.2

The difference between the two versions is as follows:

- In “be:privatperson”, the element “be:personnummer” is included in version 1.2

6Adresse

The difference between the two versions is as follows:
Some changes under “be:adresselinje”, in version 1.2. But this is of syntactical nature.

Figure 3 The enkelAdresseType XML structure in version 1.2

7 Kontaktinformasjon

No changes. (“kontaktinformasjon” lies under “part”.)

8 Rolle

The difference between the two versions is as follows:

- Some changes under “be:rolle”, in version 1.2.
9 Eiendom

The difference between the two versions is as follows:

- Attributes included, both under “eiendom” and “areal”

- In “beeieendomsidentifikasjon” of type “beeieendomsAdresseType, the element “be:bolignummer” is included in version 1.2.
10 Bygning

New attribute under “referanseeiendom”.
11 Ansvar og kontroll

The difference between the two versions is as follows:

- The element “be: godkjenningsomrade” is included in version 1.2.

Figure 6 The ansvar og kontroll XML structure in version 1.2

11.1 Kontrollerklæring

Figure 7 The kontrollerklæring XML structure in version 1.2

Generated by XMLSpy  www.altova.com
The difference between the two versions is as follows:

- In “be:referanseforetak”, “be: part-refType” is included in version 1.2, both under “prosjektering” and under “utforelse”.

11.2 Kontrollplan
The difference between the two versions is as follows:

- In “be:prosjektering”, everything preceding “fagområde” in Figure 8 is new in version 1.2.

- In “be:utforelse”, “everything preceding “fagområde” in Figure 8 is new in version 1.2.

11.3 Lokal godkjenning
No changes.

---

¹ But details in “utdanningsniva” can not be read in the documentation of version 1.0.
Figure 8 The kontrollplan XML structure in version 1.2
12 Tiltaketsramme

The element “be:varsling” and its sub-structures are new elements under “be:tiltaksramme”.

12.1 Bruk
No changes.

12.2 Bebyggelse
The difference between the two versions is as follows:

- “be:bruksarealnet” included in version 1.2.

12.3 Avstander
The difference between the two versions is as follows:

- New attributes of type “belengde” are included for “be:annetbygg”, “be: nabogrense”, “be:vegmidte”, “be:kabel”, and “be:vannogavløp” in version 1.2.

12.4 Grunn- og miljøforhold
The difference between the two versions is as follows:

- “be:grunnforholdvedlegg” with an attribute reference included in version 1.2.
- “be:rasfareellerflomvedlegg” with an attribute reference included in version 1.2.
- “be:miljoforholdvedlegg” with an attribute reference included in version 1.2.

12.5 Infrastruktur
No changes.

12.6 Plan
No changes.

13 Arbeidstilsynet
No changes, except for the fact that “be:referansepart” has changed slightly.

14 GAB registrering
No changes.

15 Vedlegg, kommentarer and any
Id attribute included in “be:vedlegg”.
